Students That Use Sit/Stand Desks Are More Alert, and Find it Easier to Remain on Task

# the Marvel FOCUS<sup>desk</sup>™ STORY

**The Desk Designed to Meet the Needs of Virtually Any Student**

*A letter from the Executive Director of the University  
of Chicago Hyde Park Day School*

The Marvel Group® worked closely with our students and teachers to design a desk that met their unique learning needs. Over a period of two years, engineers from Marvel met with teachers, took input from students, and created several prototypes to be used in the classroom. The result of this process is a desk that meets the needs of a diverse student population. The ease at which the desks can be reconfigured in a classroom make it ideal for resource rooms and special purpose classes. The desks can be raised and lowered easily using only one hand, students can adjust the height to fit their learning needs. Over spring break we changed all of our traditional desks for the Marvel Focus. It has been amazing to see the students take ownership over their learning environment. Students as young as second grade are independently adjusting the desks to optimize their learning.

Casey Crnich  
Executive Director  
Hyde Park Day School, Chicago, IL

The Marvel Group® would like to sincerely thank the students and faculty of Hyde Park Day School.
